Professional Business-Class Hosted Systems

Moving to the Cloud

Whether you are a CEO or IT manager, you need a cost effective approach to manage your technology. You need a network that is scalable, flexible and responsive. L5 Cloud Workspaces solve those challenges.

Workspaces are an integrated service delivery solution that provide immediate access to a complete computing environment ... all without the costs and risk of building and maintaining it yourself.

For a monthly fee, our service includes new servers, software licensing storage, virus protection, helpdesk support, PC and server monitoring, backup, intrusion detection, spam and spyware filtration and more.

L5 Cloud provides an all-inclusive, fully-managed and fully-supported technology infrastructure that requires minimal up-front capital investment. All the technology infrastructure, server hardware, software licensing, and ongoing maintenance are bundled together, creating a scalable platform to run your business critical applications.

The L5 Cloud Platform

Built on proven technologies, we offer a robust platform that automates business processes and accelerates application delivery, integrating the latest technologies such as virtualization, cloud computing, and automatic provisioning of applications, and combining them with on-demand performance.

Administrators can instantly provision virtual dedicated servers, IT services or business applications on a pay-per-use model.
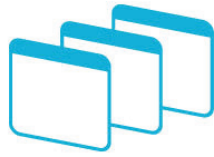

Virtual Workspace Benefits

• Maximize business productivity and collaboration with anytime, anywhere availability for users

• Eliminate the business risk associated with owning and managing computer technology

• Manage capital expenditures for hardware, software, and networking equipment
